

# **SUPERCAP**<sup>®</sup>

The Next Generation Slab<sup>™</sup>

## **PROJECT SNAPSHOT**

Finish height tolerances on this two-day cycle concrete Super Structure project made it a challenge to both the Owner and the Construction Manager.

Pyramid Floor Covering of Port Washington was hired to ensure the concrete slabs would be brought into specification at the right elevation.

Because the windows went from floor to ceiling, the wood flooring had to end at an exact point in every apartment at the window wall. Planning and surveying prior to the build-out saved a lot of time and money, and kept the project on track for the General Contractor's Temporary Certificate of Occupancy dates.

The LATICRETE<sup>®</sup> SUPERCAP<sup>®</sup> System has become a preferred choice by the Building Owner for their Projects.

**AVALON RIVER COURT, LONG ISLAND, NY**

### **LOCATION**

Long Island, NY

### **GENERAL CONTRACTOR**

Perkins Eastman AIA  
New York, NY

### **ARCHITECT**

Bovis Lend Lease, LLC
